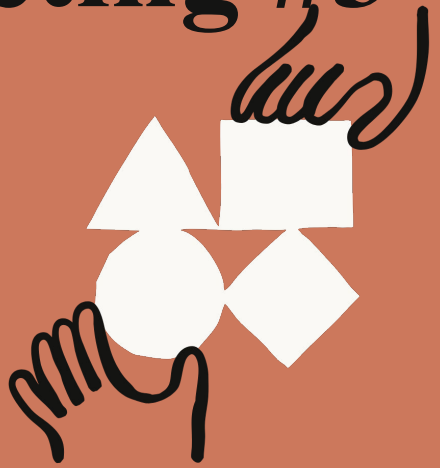
Claude presents
BUILDERS CLUB @ASU

General Body Meeting #3

Feb 26, 2026



Copyright © 2025 Arizona Board of Regents

Updates

- Business Case Competition
  - We’re hiring officers for this
  - Winner gets an interview chance w the sponsoring company

Hackathon

Anthropic CEO Dario Amodei wrote an essay titled "Machines of Loving Grace" about a future in which AI helps eliminate disease, expand opportunity, strengthen democracy, and help people find meaning.

Your projects should demonstrate how AI could genuinely contribute to humans flourishing while wrestling with the hard ethical questions. We want to see your thinking as much as your code.

Tracks

Biology & Physical Health - Make healthcare more accessible or help people manage physical health

Examples:

- Diagnostic aids for underserved clinics
- Patient education platforms
- Medication adherence tools
- Symptom assessment and triage
- Health literacy for treatment decisions
- Accessibility tools for people with disabilities navigating healthcare

Copyright © 2025 Arizona Board of Regents

Tracks

Neuroscience & Mental Health - Expand access to mental health support and understanding

Examples:

- Always-available therapeutic support using evidence-based approaches
- Mental health literacy and psychoeducation
- Tools for recognizing when you need professional help
- Stress and burnout prevention
- Peer support facilitation
- Accessibility tools for neurodivergent individuals

Copyright © 2025 Arizona Board of Regents

Tracks

Economic Empowerment & Education - Remove barriers to learning and opportunity

Examples:

- Adaptive tutoring
- Career transition guidance
- Financial literacy for underserved communities
- Job interview prep
- Small business/nonprofit support
- Scholarship matching
- Practical language learning

Copyright © 2025 Arizona Board of Regents

Tracks

Governance & Collaboration - Help people participate in democracy or work together better

Examples:

- Community deliberation platforms
- Policy explanation tools
- Legislative transparency
- Grassroots organizing support
- Participatory budgeting
- Conflict mediation
- Nonpartisan voter education

Copyright © 2025 Arizona Board of Regents

Tracks

Creative Flourishing - Amplify human creativity and help people find meaning

Examples:

- Community storytelling platforms
- Music/art education with real-time feedback
- Writing development tools
- Language preservation
- Skill development for crafts/instruments
- Intergenerational knowledge exchange
- Purpose exploration guides

Universal Principles

What we're looking for:

- Solutions to real problems for specific people (not hypothetical problems for "everyone")
- AI that empowers people rather than replacing or diminishing them
- Deep thought about who benefits, who might be harmed, and what safeguards are needed
- Working prototypes that demonstrate core functionality
- Teams that clearly understand both the problem and their approach

Copyright © 2025 Arizona Board of Regents

Critical Questions each team should answer

- Who are you building this for and why do they need it?
- What could go wrong and what would you do about it?
- How does this help people rather than make decisions for them?

Copyright © 2025 Arizona Board of Regents

Getting Started

1. Pick your track based on your expertise and what you are passionate about
2. Define the specific problem - who faces it and why it matters
3. Build a working prototype that demonstrates your core idea
4. Test your assumptions - talk to potential users if possible
5. Think through what could go wrong and build in safeguards
6. Prepare to explain your thinking as much as your code

Copyright © 2025 Arizona Board of Regents

What judges will evaluate?

- **Impact Potential (25 pts)**: Does this solve a real problem? Who benefits and how? Could it scale?
- **Technical Execution (30 pts)**: Does it work? Is it well-built? Effective use of AI?
- **Ethical Alignment (25 pts)**: Centers human dignity? Addresses potential harms? Expands access equitably?
- **Presentation (20 pts)**: Can you clearly explain what you built and why it matters?

Judging Rubric

01 Impact Potential

Is this a real problem? Who does it affect and why does it matter? Does the solution make sense?

Score	What it looks like
21–25	Addresses a specific, meaningful problem with a clear population in mind. You immediately understand who benefits and why this matters. The solution directly addresses the problem in a way that makes sense.
13–20	Addresses a real problem but the population or benefit is somewhat vague. The connection between solution and problem is logical but could be stronger.
6–12	Problem is loosely defined or the solution doesn't clearly address it. Hard to tell who this is really for or why they'd use it.
0–5	Problem is unclear or the solution has little connection to it.
	SCORE: _____ / 25 pts

Judging Rubric

2 Technical Execution

Does the core functionality work? Does it demonstrate the idea effectively?

Score	What it looks like
25–30	Core functionality works and effectively demonstrates the idea. Uses AI in a way that feels purposeful and well-considered. You can see how it would actually work for a real user.
16–24	Core functionality mostly works. AI is used adequately. Some gaps in the demo but the concept comes through clearly.
6–15	Significant gaps in functionality or the demo doesn't clearly show how it works. AI use feels superficial or tacked on.
0–5	Doesn't work or is a mockup only. Little evidence of meaningful technical implementation.

SCORE: _____ / 30 pts

Judging Rubric

3 Ethical Alignment

Did the team think seriously about potential harms? Does this empower people rather than replace them?

Score	What it looks like
21–25	Team clearly wrestled with ethical implications. Can speak to who might be harmed, what could go wrong, and what they've done about it. Solution puts people in control. Ethical reasoning feels genuine, not performative.
13–20	Team considered some ethical implications and has reasonable answers. Solution is broadly empowering. Some gaps in ethical reasoning but shows genuine awareness.
6–12	Ethical considerations feel like an afterthought. Team struggles to articulate potential harms or safeguards.
0–5	No meaningful ethical consideration. Solution risks disempowering or harming users with no acknowledgment.

SCORE: _____ / 25 pts

Copyright © 2025 Arizona Board of Regents

Judging Rubric

4 Presentation

Can the team clearly explain what they built, why they built it, and what they'd do next?

Score	What it looks like
17–20	Clear, confident explanation of the problem, solution, and impact. Demo shows the product working. Team can articulate next steps and handle questions well.
11–16	Covers the key points. Demo is functional. Team communicates the core idea clearly even if presentation is rough around the edges.
5–10	Hard to follow or key pieces are missing. Demo is unclear or incomplete. Struggles to answer questions about their own project.
0–4	Incoherent or incomplete. Can't demonstrate functionality or explain what they built.
	SCORE: _____ / 20 pts

Copyright © 2025 Arizona Board of Regents

Judging Rubric

Total score	/ 100

Special Award Flags	
☐	**"Loving Grace" Ethics Award** — Exceptional ethical reasoning and genuine commitment to human dignity
☐	**People's Choice** — Flag for participant vote
☐	**Finals Nomination** — Strong enough to represent this campus at a cross-campus showcase–

Hackathon Committee (We're hiring!)

- Tech Mentor (1-5)
- Industry Relations (1-2)
- Business Case Comp. Leads (1-3)

Send a message:

- Indicating interest
- I'll respond w/asking for resume and/or gh
- We'll set up a quick meeting (zoom)
- If it goes well I'll convert you to an officer
